

Yurii Zaika

Full Stack Engineer · .NET, Angular & React

xetr11@gmail.com · t.me/xetr_11 · github.com/qwert11 · Dnipro, Ukraine · remote or hybrid

Full stack engineer: ASP.NET Core and Web API on the back end, Angular (Kendo UI) and React / Next.js on the front, real-time over SignalR. Internal systems for a retail network: access control, audit, reporting, integrations.

AT A GLANCE

- 10 years — in production retail systems, 2016 to now
- 2 000+ — users on the access system I built
- 33 — internal systems of the network I built or extended
- 8 years — building the network's internal services on ASP.NET Core, since 2018

WHAT I DELIVERED

- Built UAM, the network's in-house access management system: 2,000+ users on OpenID Connect, ADFS and Kerberos, replacing per-system manual permission handling.
- Built the internal web systems stores work with: journals and audit, recyclables with M.E.Doc integration, a support portal, coupons and reporting.
- Architected and built the network's SMS notification platform: SMPP and GSM API, .NET Web API and MS SQL, designed for peak-volume campaigns.
- Deliver fiscal-law changes end to end across the systems: excise stamps and electronic excise documents (AED), UKTZED commodity codes, customs simplifications, new VAT rates, all in a live retail network without stopping the stores.

STACK

Backend: C#, .NET (Core 3.1 → 7), ASP.NET Core, ASP.NET MVC, Web API / REST, SignalR, Worker Services, Hangfire, Quartz, AutoMapper

Front end: Angular 13, TypeScript, React 19, Next.js 16, Kendo UI for Angular, Telerik UI for ASP.NET Core, Razor / MVC views, Tailwind CSS, Zustand / TanStack Query, Expo / React Native, MapLibre, JavaScript, HTML / CSS

Data: MS SQL Server, T-SQL, PostgreSQL, EF Core, ADO.NET, Oracle, SSIS, SSRS, SQL CLR

Access and security: OpenID Connect, OAuth2, JWT Bearer, ADFS, Kerberos / Negotiate, Active Directory, RBAC

Integrations: EDI / e-document flow, M.E.Doc, Oracle EBS, 1C, Kafka, BizTalk, WCF / SOAP, SMPP / GSM API, API Gateway

Quality and delivery: xUnit / NUnit, NSubstitute / Moq, AutoFixture, FluentAssertions, SonarQube, Jenkins, Docker, Serilog / NLog, Elastic APM, Git / private NuGet feed

Engineering practice: Production ownership, Legacy modernization, Integration design, Modular monolith, GitHub Actions

Working with AI agents: Claude Code, MCP servers, Custom subagents and hooks, Agent tooling (CDP)

Node.js back end: NestJS, Prisma, Node.js

KEY PROJECTS

UAM — access management (2020 — 2022)

Centralized permissions and authentication for 2,000+ people in the network: roles and access requests, Active Directory integration, sign-in through OpenID Connect, ADFS and Kerberos.

ASP.NET Core, C#, EF Core, MS SQL, OIDC, ADFS, Angular

SMS Messenger (2020 — 2023) — Architect and developer

The network's SMS notification platform: an in-house gateway to carriers over SMPP and to modems over GSM API, campaign queues, an API for internal systems.

ASP.NET Core, Web API, SMPP, GSM API, MS SQL, Hangfire

API Gateway and reporting service (2018 — 2020)

A gateway for the network's internal services and a reporting service over MS SQL: a single entry point, header and auth propagation, Excel exports.

.NET Core, Web API, MS SQL, SSRS, GemBox.Spreadsheet

Store Journals (2021 — 2023)

Journals and audit platform for the network's stores: in-store entry, inspections, regional reporting, real-time updates

over SignalR.

ASP.NET Core, Angular 13, Kendo UI, EF Core, MS SQL, SignalR

AM Mobility — web and mobile app (2026) — Full stack developer

Client project: a NestJS back end with Swagger and PostgreSQL, a Next.js web app, and an Expo / React Native mobile app with MapLibre maps, geolocation and offline state.

NestJS, Next.js, Expo, React Native, PostgreSQL, MapLibre, TanStack Query

Recyclables and returnable packaging (2019 — 2024)

Web system for recyclables and pooled packaging with document flow: M.E.Doc integration, supplier exchange over EDI, accounting reports.

ASP.NET Core, ASP.NET MVC, EF Core, MS SQL, M.E.Doc, EDI

EXPERIENCE

ATB-Market — Lead Software Engineer

2016-06 — present · Dnipro

- Since 2018 I build and run the network's internal services on ASP.NET Core and Angular: access, audit, reporting, integrations — 33 of the network's systems I built or extended.
- UAM: access management for 2,000+ users on OpenID Connect, ADFS and Kerberos.
- Network integrations: EDI and e-document flow, M.E.Doc, Oracle EBS, 1C, Kafka, BizTalk, SSIS and SSRS.
- Engineering practice: xUnit and NSubstitute tests, SonarQube and Jenkins, Serilog, Docker, a private NuGet feed.
- In parallel I maintain the legacy Delphi trading client whose functions are moving into the .NET services — I know the system being replaced from the inside.

Personal projects and freelance — Independent developer

2026-03 — present · Dnipro · remote

- Client work: NestJS with Prisma and PostgreSQL, Next.js 16 with React 19, a mobile app on Expo with MapLibre maps.
- Daily work with AI agents: MCP servers, custom subagents and hooks, and my own CDP browser inspector as agent tooling.

Earlier: Freelance and private practice — Full Stack Developer (2015–2016) · Modern Professions Courses — Programming Instructor (2015–2016) · Kryvyi Rih Iron Ore Combine — Software Engineer (2013–2016) · OSSystem — Developer (2012–2013)

DOMAIN KNOWLEDGE

- Excise control: electronic excise stamps and documents (AED): Stamp scanning, electronic excise documents, document number in the invoice
- Tax invoices and adjustments: Issuing, adjustments, field rules aligned with the tax service
- Commodity classification codes (HS / UKTZED): Commodity code synchronization across the network's systems
- Customs and import clearance: Customs declarations, import receipts into warehouses, reporting
- EDI and e-document flow: Orders, waybills, pooled packaging, supplier exchange
- VAT rates and pricing regions: Cross-system rate changes, region setup when a store opens

EDUCATION AND CERTIFICATES

- Computer Engineering · computer systems and networks — Zaporizhzhia Institute of Economics and Information Technologies
- Angular 9 — Luxoft (2021)

CODE ON GITHUB

- TeamBeacon — a real-time beacon for finding your group in a crowd: ASP.NET Core, SignalR, Docker
<https://github.com/qwert11/TeamBeacon>
- SQL Profiler Normalizer — turns profiler sp_executesql output into a readable EXEC, fully client-side
<https://github.com/qwert11/sql-profiler-normalizer>
- Resume Engine — this site: YAML to Jinja to HTML, PDF, DOCX and Markdown in two languages
<https://github.com/qwert11/resume2>
- Housing catalog across nine regions — six-source aggregator with a map, price indices and a GitHub Actions build
